Netflix

An online streaming service that allows people to watch a shows. It is "acting and learning" as it learns the viewers patterns and behaviour, and suggests shows based on what you have watched.

Act and Learn

Act- When AI enables a machine to take actions based on an AI's understanding of what is required.

Learn- From this information, the AI can then learn from its outcomes and optimise its performance.

Self-driving cars

A self-driving car is a vehicle that is capable of sensing its environment and moving safely. It uses deep learning, to learn about the roads, which means it is constantly "acting and learning".

Technologies Behind It Are
